

BENNETT PACKAGING

Bennett Packaging is a woman-owned vendor, WBE-certified by WBENC.

Remove	<ul style="list-style-type: none"> • Being an in-house, turn-key shop removes the 'middle man' - which removes redundant transportation emissions and associated costs. • We eliminate need for over packaging, overwraps and inner-pac through design technology and testing. • Changing from packaging materials with a high environmental impact to renewable and recyclable corrugate packaging makes good business sense.
Reduce	<ul style="list-style-type: none"> • Our unique underground manufacturing facility offers significant energy savings through 'natural' climate control. • We achieve huge source reduction of raw materials through high-performance linerboard and design. • Recycled raw material helps save water, electricity, landfill space, trees, dangerous chemicals and deadly methane gas emission. • Emission-free fork trucks (We use electric only.) • Efficient shipping consolidation & backhauls save fuel emission. • Our state-of-the-art trucking fleet has optimum fuel and emission reduction equipment. • We offer corrugated pallets. • We only use earth-friendly, water-based inks on all of our equipment.
Reuse	<ul style="list-style-type: none"> • Our manufacturing facility is 430,000 sq ft of reclaimed underground space; recipient of the White House "Closing the Circle" Award. • State-of-the-Art Jumbo Press manufactures reusable "bin boxes." • We utilize pallet exchange programs.
Renew	<ul style="list-style-type: none"> • Cradle-to-grave environmental stewardship is a basic hallmark of corrugated production from trees, a natural and renewable resource.
Recycle	<ul style="list-style-type: none"> • The corrugated industry has the best recycling rate of any packaging material used today, recovering more material from municipal waste than all other industries combined. • Our raw materials have high percentages of secondary fiber including old corrugated containers, kraft and old newspapers. We are proud to offer 100% recycled material upon request. • We recycle 100% of our raw material scrap. • All of our electric forklift batteries are recycled.
Revenue	<ul style="list-style-type: none"> • We offer in-house, total turnkey solutions - design, manufacturing, fulfillment, pallet programs, inventory control warehousing and distribution. This compresses the supply chain, drastically reducing time-to-market, costs, and inventories. • Quality assurance management system to ISO 9001 standards. • E-Business and online order entry, order tracking and inventory management. • We operate in cost effective locations for receipt of goods and distribution.

Bennett Packaging: Our entire lifecycle is earth-friendly!

- Our facility is 430,000 square feet of reclaimed **underground** space, which provides natural climate control with no energy spent for heating or cooling. Winner of the **White House "Closing the Circle"** award.
- Our **turn-key operation** reduces resources spent on material transfer (design, manufacturing, fulfillment, pallet programs, warehousing and distribution are done in-house, reducing time-to-market.)
- Our **corrugated** production incorporates water-based inks, recycled raw material and **100% scrap recycle**.
